Professional Summary

Highly motivated ICT student at Daeyang University with hands-on experience in software development, systems design, and analysis. Proficient in both frontend and backend development, with a strong emphasis on creating responsive, user-friendly interfaces. Specializes in HTML, CSS, JavaScript, Flutter, and React Native, with backend knowledge in Django, PHP, and MySQL. Demonstrated skills through projects such as a university voting system, hospital diagnostics system, currency converter app, and client portfolio websites. Experienced in REST API integration, database management, and cloud-based solutions. Also adept in photography, videography and business entrepreneurship. Proven ability to solve technical problems and deliver innovative solutions.
