PROFILE

A versatile and detail-oriented Software Developer with expertise in designing and developing scalable, high-performance web and mobile applications. Proficient in Node.js, Express.js, Python, Django, Flask, React.js, Next.js, React Native, and PHP, with a strong command of HTML, CSS, and Bootstrap CSS for responsive front-end design. Skilled in back-end development, API integration, and containerization using Docker. Experienced in programming with C and C++, including graphics programming with OpenGL. Passionate about delivering innovative solutions, optimizing performance, and contributing to collaborative and dynamic development environments.

WORK EXPERIENCE

Department of Economic Planning and Development   AUG 2024 - PRESENT
ICT - Technician

Aquaponics for Life

Web Developer
                                                                                                          JAN 2024 - April 2024

EDUCATION

Bachelor of Science Information and Communication Technology   AUG 2022 - PRESENT

Daeyang University

PROJECTS

- Built a Digital Traffic Ticketing System for a school project using React Native, Express Js and Python and MySQL
- Built a Web Scrapper for a personal project using Python, React Js and MySQL
- Built a blog for a personal project Using HTML, Bootstrap CSS, Express JS and MongoDB
- Built A SnapChat clone Using Flutter and Firebase
